PROJECT MANAGEMENT CURRICULUM

Our programme is a structured, results-focused roadmap designed to take you from zero experience to job-ready project manager.

Your Training Breakdown

The right training, the right support. Everything you need to step into a project management role with confidence. Our programme equips you with industry-recognised certifications, practical experience, and expert guidance. And with our job guarantee, you can train knowing your future is secure.

APM Project Fundamentals Qualification (PFQ)

Your introduction to project management. This course lays the groundwork, covering key principles, processes, and terminology. You'll gain a structured understanding of the entire project lifecycle, from initiation to closure, equipping you with a strong foundational grasp of the field.

Accredited by the Association for Project Management (APM), the world's only chartered institute for project management. APM certifications follow UK best practices – providing the framework you'll adhere to and apply throughout your career. The APM PFQ will teach you how to think, communicate, and operate like a project manager.

PRINCE2® Foundation

Start with one of the world's most widely used project management methodologies. The PRINCE2® Foundation course gives you a clear understanding of its principles, practices, and processes.

Where the APM PFQ provides the framework, PRINCE2 is the methodology – the step-by-step approach to managing projects effectively. Together, they give you both the structure and the process to succeed in your project management career.

PRINCE2® Practitioner

Take your knowledge further. This advanced certification builds on your foundation, teaching you how to apply PRINCE2® methodology in real-world scenarios. You'll learn to manage project stages, control deliverables, and make informed decisions.

Project Management Simulated Assignment

Understanding project management is one thing. Doing it is another. This assignment immerses you in a real-world project environment, where you'll create key project documents, shadow decision-making processes, and oversee a project from start to finish – building the hands-on experience employers look for.

YOUR SUPPORT TEAM

Success doesn't happen in isolation.

Throughout the programme, you'll have access to expert tutors, interactive learning tools, and a support network designed to keep you on track

Your **Support** Team

The Learning Phase:

One-to-One Tutor Support

Your tutor is just a message away. Whether you need to arrange a one-to-one call, get additional study materials, or ask questions about your course, they're there to help. With real industry experience in project management, they can provide insights beyond the curriculum

Course-specific Webinars and Tutorials

We know what challenges students face because we've trained thousands of them. That's why we provide a library of tutorial videos and live webinars that dive into the finer details to give you extra clarity when you need it.

Personalised Feedback on Your Progress

Learning isn't one-size-fits-all. Your tutor works closely with you to understand your strengths and areas for improvement, tailoring their approach to maximise your growth. Exam prep is thorough, ensuring you're not just familiar with the material but fully prepared to pass.

Resource Library & Peer Network

Beyond structured training, you'll have access to an extensive resource library with additional study materials to support your learning. You'll also join an exclusive Online Community of fellow students, giving you a space to connect, ask questions, and engage with people on the same journey.
