# Network Engineer Job Programme

## Get Hands-On. Get Certified. Get Hired.

### Qualification:

Gain industry-leading, internationally recognised, UK-accredited qualifications

### Completion Time

8-10 weeks
**If you are studying 2 hours a day**

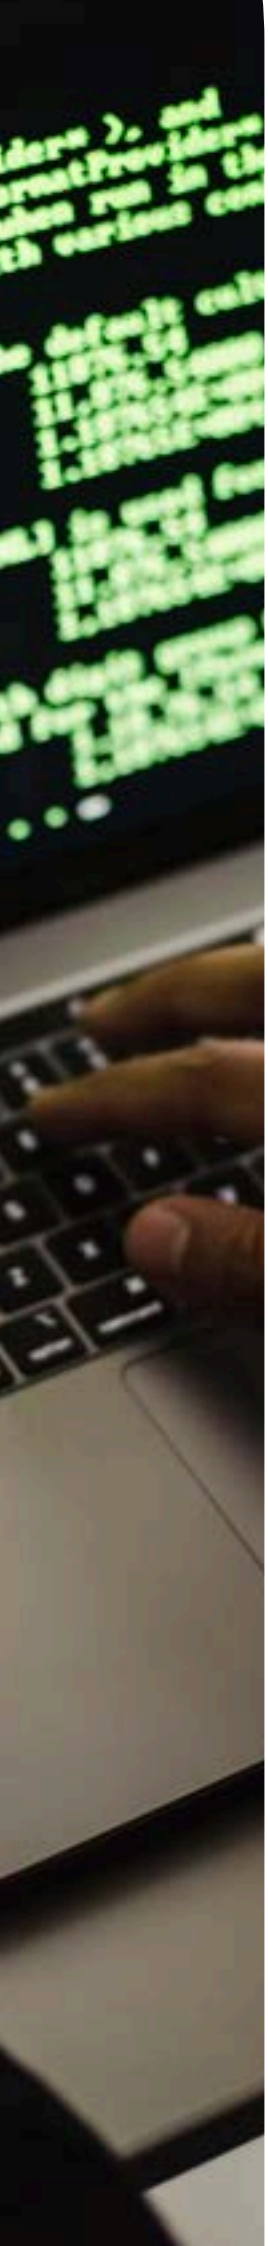
### Total access period

12 Months

Network systems don't manage themselves. Businesses rely on skilled professionals to design, maintain, and troubleshoot their networks, ensuring seamless operations. If you're ready to step into a hands-on, fast-paced career where no two days are the same, we have the programme to get you there.

The ITOL Recruit Network Engineer Job Programme is designed for those who want to learn by doing. You'll complete industry-recognised CompTIA certifications and receive dedicated recruitment support to help you secure your role. Follow the process, complete the programme, and start your career in network engineering. If you don't land a job, we'll refund your investment.

Let's get started.



## What Do We Provide?

Every part of the programme is designed to prepare you for the demands of a Network Engineering role and help you secure employment.

- UK-Accredited Qualifications
- Dedicated Recruitment Support
- Live Labs for Practical Experience
- Real-World IT Exercises
- Industry-Leading Certifications
- Qualified Human Mentor & Tutor

## Why Choose a Career in Network Engineer:

Breaking into network engineering takes more than just certifications. You need hands-on experience and a clear path to employment. This programme is designed to get you both.

- **High Demand** – Businesses depend on network engineers to keep their systems running smoothly, ensuring seamless communication and security. This makes network engineering a stable and vital career.
- **Competitive Salaries** – Network Engineers earn solid starting salaries, with clear pathways to higher-paying specialist roles.
- **Diverse Career Paths** – Network engineering provides the foundation for a wide range of career options, from network administration to network technician, cybersecurity, and systems architecture. Your opportunities are vast.
- **Global Opportunities** – With the need for network professionals spanning all industries, you'll have the chance to work internationally, whether remotely or on-site, and your skillset is in demand across the globe.

## How You'll Learn

- **Hands-on training –** Develop your skills by working through real cyber security scenarios.
- **Real-world application –** Learn to identify vulnerabilities, secure networks, and respond to threats with practical exercises that reflect real industry challenges.
- **Expert Support –** Learn from experienced tutors who break down complex ideas, provide feedback and help you refine your skills.

Our job guarantee means you're not just training for a role; you're landing one.

# Your Pathway to Success

Network Engineering is built on problem-solving and technical know-how, and so is this programme. It provides a structured path to help you develop essential skills, gain hands-on experience, and step into a Network Engineering role.

1

**TALK TO A CAREER ADVISOR**

Not sure where to start? Our advisors help you explore options and align your training with your career goals.

2

**COMPLETE THE TRAINING**

Learn the skills employers look for, pass the assessments, and gain hands-on experience.

3

**WORK WITH A RECRUITMENT ADVISOR**

Get personalised support to refine your CV, optimise your LinkedIn profile, and prepare for interviews.

4

**SECURE THE JOB**

With tailored career support, you'll be ready to step into your new role.

# Where Could This Take You?

A career as a Network Engineer offers stability, hands-on work, and strong career growth. Here's where this path can lead:

**NETWORK TECHNICIAN**

**£25K – £32K**

Install, maintain, and troubleshoot hardware, software, and networks for businesses. You'll work on-site, keeping systems running smoothly and ensuring minimal downtime.

**IT SUPPORT ENGINEER**

**£29K – £31,5K**

Take on more complex technical challenges, providing advanced troubleshooting and system maintenance. You may work with servers, cloud platforms, and enterprise networks.

**NETWORK ENGINEER**

**£49K – £53K**

Specialise in designing, configuring, and securing business networks. You'll ensure connectivity, optimise performance, and protect systems from cyber threats.

# RECRUITMENT

You've built the skills, completed the projects, and earned your qualifications. Now it's time to secure the role.

That's where we come in.

# Your Job, Guaranteed or Your Money Back

We stand by our training. Follow the process, complete the programme, and secure a role, or you get your money back.

Our job guarantee includes:

- Personalised career coaching tailored to your job search.
- An optimised CV and LinkedIn profile to attract employers.
- Comprehensive interview preparation so you feel confident in every opportunity.

# The Process

### Preparation

We know what hiring managers ask because we've helped thousands of candidates through this process. Our recruitment advisors offer one-to-one exam prep sessions tailored to the role and company you're interviewing for, ensuring you're fully prepared for the questions and assessments.

### CV & LinkedIn Overhaul

Your CV and LinkedIn profile are your tickets to getting noticed. Our team works with you to sharpen them so you can stand out in a competitive market.

### Mock Interviews

Confidence comes with practice. Our mock interviews allow you to refine your responses and get feedback.

### Job-Related Assessments

Some roles involve extra hurdles – tests, case studies, or technical challenges. We'll make sure you know what to expect and how to handle them.

### Job Application Support

We guide you through the process, from knowing where to apply to ensuring your application hits the mark. With us in your corner, you will make real progress toward landing your role.

We back that confidence with a **job guarantee or your money back.**

# SUCCESS STORIES

Real success stories from students who’ve completed the programme and launched their careers.

We could tell you, but our candidates say it best.

## Ochuko Komeme

**From:** Pharmacy Technician
**To:** Cyber Security Analyst

After working as a Pharmacy Technician, Ochuko decided to pursue a more future-focused career. He joined ITOL's Cyber Security Job Programme, where he earned industry-recognised certifications and received tailored support on his CV and interview prep. Ochuko now works as a Cyber Security Analyst, enjoying a role that challenges him daily and allows him to make a meaningful impact in the tech space.

# NETWORK ENGINEERING CURRICULUM

Our programme is a hands-on route into IT support which equips you with the practical skills and certifications to become a job-ready technician trusted to keep systems running smoothly.

# Your Training Breakdown

This programme is designed to make you job-ready, combining industry-recognised training with hands-on experience. You'll complete CompTIA A+ and Network+, two of the most widely respected IT certifications, along with Live Labs, to apply your skills in real-world scenarios.

## CompTIA A+

The gold standard for entry-level IT roles, CompTIA A+ validates your ability to install, configure, and support a wide range of IT systems. While it's typically associated with IT support, it also provides foundational knowledge that's valuable for anyone working in network environments, including network engineers.

## CompTIA Network+

Gain the essential skills to set up, manage, and secure networks in any IT environment. CompTIA Network+ covers key areas such as network troubleshooting, infrastructure, operations, and security, preparing you for roles in network engineering, network administration, and network security.

# YOUR SUPPORT TEAM

Success doesn’t happen in isolation.

Throughout the programme, you’ll have access to expert tutors, interactive learning tools, and a support network designed to keep you on track.

# Your Support Team

**The Learning Phase:**

### One-to-One Tutor Support

Your tutor is just a message away. Whether you need to arrange a one-to-one call, get additional study materials, or ask questions about your course, they're there to help. And with real industry experience in IT, they can provide insights beyond the curriculum.

### Personalised Feedback

Learning isn't one-size-fits-all. Your tutor works closely with you to understand your strengths and areas for improvement, tailoring their approach to maximise your growth. Exam prep is thorough, ensuring you're not just familiar with the material but fully prepared to pass.

### Resource Library & Peer Network

You'll also join an online community of fellow students, giving you a space to connect, ask questions, and engage with people on the same journey.

### Guidance From Certified Experts

Your success is backed by the expertise of experienced Network Engineers who have worked across industries. They don't just teach the material – they guide you through real-world applications, ensuring you're job-ready.
